

WHAT IS CLAIMED IS:

1. An improvement on a golf club, comprising  
a shaft;  
5 a club head having a borehole for insertion of the shaft; the borehole  
including an upper portion and a lower portion smaller than the  
upper portion in diameter; and  
a protecting insert for cushioning the shaft against fracture; the  
protecting insert having a first through hole for insertion of the shaft;  
10 the protecting insert including an upper end portion, and a fixing  
lower end portion smaller than the upper end portion in diameter;  
the insert being joined to the club head with the upper end portion,  
and the fixing lower end portion being respectively disposed on top  
of the borehole, and inserted into the upper portion of the borehole,  
15 and with glue being applied between an outer side of the insert and  
a wall of the borehole upper portion; a lower end of the shaft being  
inserted through the insert and into the borehole with glue being  
applied on an outer side thereof;  
the protecting insert being formed with a plurality of second through  
20 holes on the lower fixing end portion for allowing the glue applied  
over the outer side of the shaft lower end and the glue applied over  
the outer side of the fixing lower end portion of the insert to be  
joined together.

2. The golf club as claimed in claim 1, wherein the second through holes are made in regular shapes.
3. The golf club as claimed in claim 1, wherein the second through holes are made in irregular shapes.
